Standard & Poor's Investment Services (IS) obtains the data for calculating Total Shareholder Return information from sources that it believes are reliable, but does not make any representation or warranties with respect to, nor does it guarantee the accuracy, adequacy or timeliness of, the data contained in the Total Shareholder Return service or the compliance of the methodology used to create actual returns or graphs with the requirements of the SEC. Standard & Poor's IS shall have no liability with respect to errors or omissions in the Total Shareholder Return service.

For purposes of Corporate Disclosure – Shareholder Return, the client has selected the broad market index and industry index or peer group of companies used to calculate a custom peer group index and is solely responsible for same. Standard & Poor's IS believes that its methodology used in calculating returns and creating graphs is appropriate. Any order of this product offering constitutes acceptance of the Standard & Poor's IS methodology. Neither Standard & Poor's IS nor any third-party licensors or providers of data to Standard & Poor's IS makes any warranty, expressed or implied, as to results to be obtained by the client or others from use of the services, and there are no expressed or implied warranties or merchantability or fitness for a particular purpose or use.

The Global Industry Classification Standard (GICS®)

GICS is an industry classification system that was developed by Standard & Poor's and MSCI Barra in 1999. The GICS structure is comprised of: 10 Sectors, 24 Industry Groups, 68 Industries and 154 Sub-Industries. A company is assigned to a single GICS sub-industry according to the definition of its principal business activity as determined by Standard & Poor's and MSCI. Revenues are a significant factor in defining principal business activity; however, earnings analysis and market perception are also important criteria for classification. GICS was developed in response to the financial community's need for one complete, consistent set of global sector and industry definitions. GICS codes are applied to companies globally, in both developed and developing markets. Over 29,000 companies globally have been classified to date by Standard & Poor's and MSCI. For more information about GICS, please visit www.standardandpoors.com. Each of the GICS sectors and sub-industries listed below are available for the major indices, including the S&P MidCap 400, S&P 500, S&P SmallCap 600, and S&P Composite 1500.
